Seminar Invitation 2012

*Are you ready for the new
amendment I sections
443 & 534 of the Wiring
Regulations?*

**DEHN Offer a one day
ESSENTIAL seminar for
anyone involved in
Surge &
Lightning Protection**

Overview

With the introduction of surge protection devices (SPDs) into the BS7671 amendment 1 2011 the standard now recognises the importance of these devices in limiting the effects of not only lightning currents from natural sources, but also switching events from man-made events like the switching of inductive loads and contactors operating.

The damaging effects of surges has long been identified but without a clear set of instructions to deal with them. BS7671 amendment 1 now has section 534 to deal with the installation of the surge protection devices and section 443 to deal with the risk assessment that would determine if SPDs are required or not in an installation.

The DEHN BS7671 seminars have been designed to take the installer and designer through the process of product selection and installation in accordance with the requirements of the standard

About DEHN (UK) Ltd

DEHN (UK) Ltd is the UK subsidiary of DEHN + SÖHNE. The DEHN Group celebrated 100 years in 2010, during this time it has become a worldwide leader in the field of Lightning and Surge protection.

A team of highly technical personnel are employed to help customers make the correct choice for Lightning and Surge protection. DEHN (UK) Ltd has been involved in many prestigious projects over the years.

Seminar Objectives

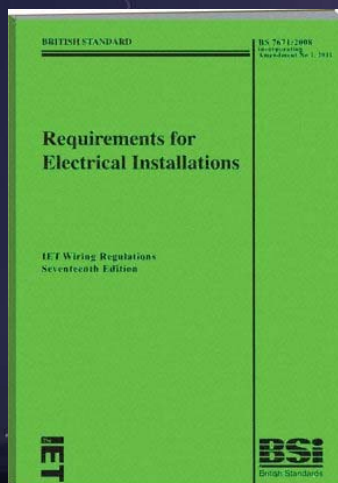

To give a clear, concise understanding of the requirements of the new standard and be able to apply them.
