

Clearly marked without tools

Assortment case for marking lightning protection and earth-termination systems

Complete assortment case including more than 1,650 single parts for marking test joints, down conductors and connection lugs

Fast and uniform

The variable number plate is used to mark test joints, down conductors and connection lugs. The pre-marked number inserts allow to individually equip the number plate without additional tools (numeral punches and hammer). This ensures uniform marking.

Pre-sorted and readily available

The variable number plate is available as number marking set including accessories in an assortment case. This ensures that the worker has a pre-sorted system at hand. Thanks to the clearly organised box and the completely lockable cover, the contents remain tidied up.

Permanently marked

Easily recognisable and weather-proof marking makes it easier to regularly check and maintain the lightning protection and earth-termination system according to IEC/EN 62305-3¹⁾ at a later date. This ensures permanent documentation of the lightning protection and earth-termination system according to DIN 18014²⁾ and Supplement 3 of DIN EN 62305.

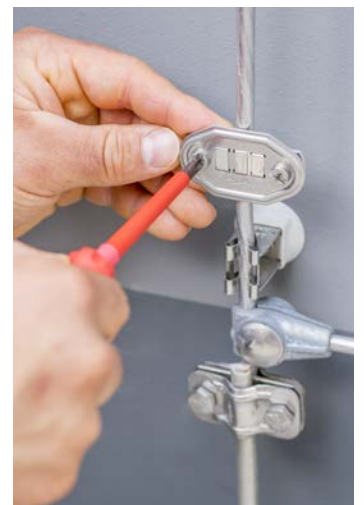

First step: Take the pre-punched number plate from the assortment case.

Second step: Click the pre-marked number inserts into the number plate.

Third step: To fix the number inserts, bent them at the rear side (bending mechanism).

Fourth step: Fix the marked number plate at the down conductor.

¹⁾ IEC/EN 62305: Protection against lightning – Part 3: Physical damage to structures and life hazard

²⁾ DIN 18014: Foundation earth electrode – Planning, execution and documentation

Assortment case for marking lightning protection
and earth-termination systems

Assortment case (variable number plate)

- Plastic case including 1,650 single parts
- Impact-resistant and robust, compatible with Sortimo® L boxes
- Coloured inserts ensure easy sorting and use
- Completely lockable cover
- Parts stay in the compartments during transport
- All parts can be reordered individually

Assortment case (variable number plate)

Material	Plastic
Dimensions	450 x 360 x 120 mm
Part No.	490 999

Contents:

- 100 pcs. number set "0" to "9"
- 100 pcs. unmarked number insert
- 100 pcs. variable slotted number insert
- 300 pcs. slotted head screw (StSt, M6 x 16 mm)
- 50 pcs. carrier plate for test badge (StSt)
- 50 pcs. bracket (aluminium, Rd 7–10 mm)
- 50 pcs. bracket (aluminium, Rd 16 mm)
